

## **Substitutes for school nurses**

We need you! When a nurse is absent from school, it is very important that we have a qualified substitute available to cover the nurse's office and provide ongoing support to all students, especially those students with medical concerns. Never worked as a school nurse? No worries, our wonderful nursing professionals will provide you with an overview and training for the most common types of issues you will face in our schools.

We are at a critical position where our list of available nurses is very limited. If you would be willing to be placed on our substitute list, or know someone who is, please contact H.R. Director, Ken Storlazzi @ 978-639-3213.
